Description

Many of us have annual check-ups with our doctor that help us to evaluate how our health is. Others may have regular tune ups on their vehicles in order to keep them running smoothly. That is the purpose of this book. We all need marriage tune ups from time to time and check-ups to help us evaluate our marriages and detect areas that we need to improve on. Tune ups and check-ups are about preventative maintenance before real problems arise! I'm sure every couple desires a purposeful marriage.

A purposeful marriage moves from just "getting by" to truly flourishing by intentionally serving, connecting, and growing together, focusing on shared vision for your marriage and mutual support rather than just individual needs. This can happen as we practice consistent communication, acts of love, prioritizing the "we" over the "me," and fostering individual growth to strengthen life together. Here's a sample of what is covered inside:

Key Shifts from Existing to Thriving:

- From "Me-Focused " to "We-Focused "
- From Drifting to being Intentional
- From Survival to Shared Vision

How to Thrive:

- Cultivate a Servant's Heart
- Communicate & Connect

- Prioritize Togetherness
- Embrace Growth
- Practice Forgiveness & Commitment
- Build a Strong Foundation
