Description

The life cycle of a butterfly: From nearly invisible eggs, tiny striped caterpillars emerge. They begin feeding on the surrounding milkweed leaves immediately, storing food for the transition to come. After two weeks, they form a chrysalis, from which a monarch butterfly emerges after another two weeks.

Set contains 4 pieces - Size: 7.61" W 8.97" H x (19.5 cm x 23 cm) - Age: 3+
